

When to Get Your

AIR CONDITIONING SYSTEM CHECKED

Here are some of the top signs that your Air Conditioning system needs some checkup. In case you notice one or more of the below signs, it's time to contact an HVAC professional.

1

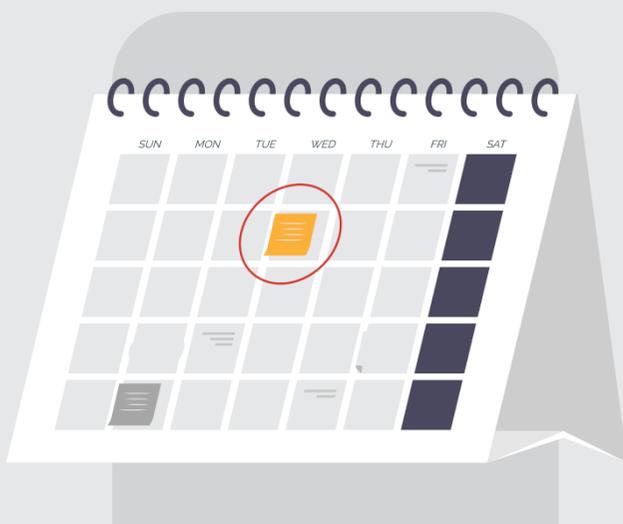

If the Air conditioning unit is not working as well as it used to

Here are some of the top signs that your Air Conditioning system needs some checkup. In case you notice one or more of the below signs, it's time to contact an HVAC professional.

2

If your air conditioning is more than 15 years old

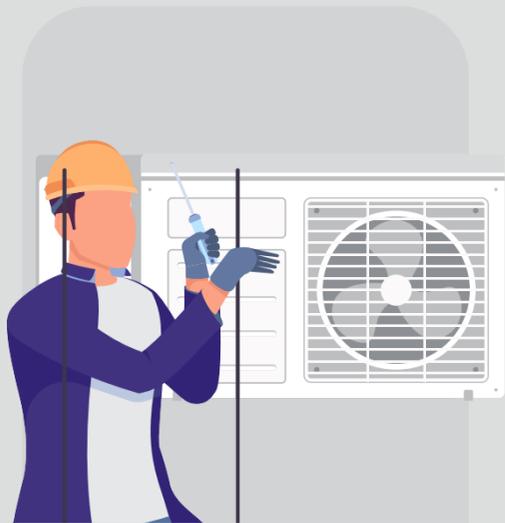

When your air conditioner celebrates its tenth birthday, you should start making plans for its retirement. Most air conditioning systems have a warranty covering only ten years, so if anything happens after the warranty coverage, you'll have to cover all the repair costs.

3

Your power bills keep growing

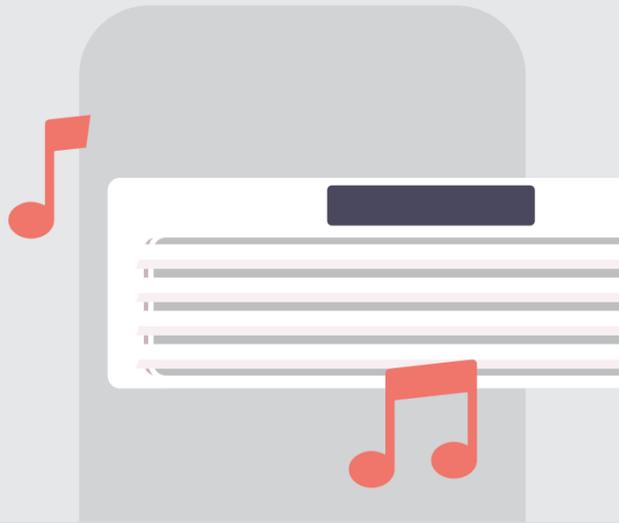

If your power bills start shooting up after you notice your HVAC system is not functioning as well as you would like it to, it probably has something to do with the air conditioning. You should get a professional to perform a thorough inspection.

4

When the air conditioning is making funny noises

Is your air conditioning giving you sleepless nights? Then it's probably time to call in one of our expert HVAC specialists to take a look at what is amiss.

5

If the air-conditioning system is not turning on and off

Is your air conditioning not turning on when you turn on the power? This could indicate a problem with the power supply or power system in the air conditioning system. Give us a call, and we'll get your home the favorite room temperature in no time. [Click here for Information on the company services](#)
